Education

Clemson University (Clemson, SC • 2022)

- I successfully completed the technical writing certification course.

University of Illinois Chicago (Chicago, IL • 2018-2021)

- I graduated with a bachelor's degree in computer science with a specialization in software engineering.
- GPA: 3.24

University of Wisconsin Parkside (Kenosha, WI • 2016-2018)

- I pursued a bachelor's degree in computer science before transferring to the University of Illinois Chicago.

Relevant Experience

- **Service Desk Analyst at Frontline Managed Services (Sept. 2024-Present):** I assist employees of several law firms with a wide variety of technical issues (e.g. with Microsoft 365 products and document management systems) by quickly researching problems, remotely accessing their computers, and executing troubleshooting steps, escalating tickets if I cannot resolve the issue. It is my responsibility to accurately determine the urgency of an escalated ticket, reaching out to on-call staff when needed. We use the ServiceNow ticketing system and Genesys for call handling. I emphasize thorough documentation and white-glove customer service in my work, always remaining polite and understanding of customers' needs. Additionally, I have received training to write KB articles.
- **Electronics Assembly Technician (Sept. 2023-Feb. 2024):** I placed electronic components into circuit boards, soldered components, flashed MIPS firmware to EEPROM chips using MARS, and evaluated assembled circuits using multimeters, oscilloscopes, and custom-built test fixtures. I primarily worked with audio circuits such as PA systems, microphone preamps, and emergency phones for elevators.
- **Teaching Assistant at UW-Parkside (Sept. 2017-May 2018):** I primarily helped students to debug their programs during weekly group lab assignments which focused on learning object-oriented programming with Java. I also walked through worksheet solutions for the class during discussion and occasionally stayed after-hours to answer students' questions regarding their homework assignments.
- **Writer/Editor for Ranger News at UW-Parkside (Sept. 2016-May 2018):** I both wrote and edited articles for the campus news and opinion sections of the student newspaper using the AP style. I frequently conducted interviews with students and faculty and researched background for the topics I discussed, incorporating quotes and citing my sources.

Skills

- Customer service, technical support, troubleshooting, ticket documentation, proficiency with Linux and Windows, Active Directory, ServiceNow, Genesys, Proxy Pro, Bomgar, Citrix, iManage, NetDocuments, DMS, Microsoft Office 365, Duo, Mimecast, Proofpoint, Intune, MDM, printer/scanner setup, TCP/IP, web sockets, HTTP, Node.js, DNS, PowerPDF, Adobe Acrobat, code debugging, Java, C/C++, JavaScript, HTML, CSS, SQL, Python, debugging, Git, algorithms and data structures, unit and regression testing, agile development, scrum, report and documentation writing, audience analysis, electronics
